

Safety & Health Policy

We are committed to being an injury-free organisation, ensuring the safety and health of the employees, contractors and visitors in our operations. We also play an influential role in upgrading the standards of our business partners.

Our business conduct recognises safety as an integral part of its operations and strives to meet and exceed compliance, with applicable regulatory Safety and Health requirements.

To reach higher standards of safety and health, a culture of prevention is encouraged through proactive measures and techniques. Everyone has the prime responsibility of demonstrating commitment towards safety.

To achieve these objectives, Tata Motors will engage its employees and allocate adequate resources for continual improvement in its Safety and Health performance.
